Machine for tape insulation of steel pipelines welded in joints. Insulation is made in field conditions before putting a pipe into the trench

For cleaning of outer surface of a pipeline it is recommended to use cleaning machine with benzine engine with hard steel brushes.

CHARACTERISTICS

- Insulated pipelines diameter, mm...57-219
- Mass, kg.....65
- Number of workers making insulation, men.....1
- Engine..... benzine type
- Insulating material to be used..... inner tape, outer wrap
- Efforts of tension of tape..... regulated
- Time of the whole machine installation on a pipeline, min.....10-15
- Time of dismantle of mechanical drive with engine, min2-3
- Productivity of insulation, m³/hour.....250-300

The machine is produced in 2 or 3 spooled variants.
